

X-RAY AND NEUTRON SCIENCE

International
2-28
student
Sept
summer
2024
programme

at the European Photon Neutron Science Campus
ILL/ESRF, Grenoble, France

The ILL/ESRF International Student Summer Programme on X-Ray and Neutron Science is aimed at **undergraduate students**. It will consist of a **4-week experimental project** embedded in a research group of ESRF or ILL, together with a **series of introductory lectures** on the principles and applications of X-ray and neutron science (magnetism, materials science, soft matter, structural biology, imaging, etc.).

Undergraduate students from a **Member Country (or Scientific Associate Country) of ESRF or ILL** are eligible to the Summer Programme. The number of participants is limited to about 20.

All **selected participants** will receive a financial support and free accommodation in Grenoble.
